

MARÍA DE LOURDES MALAGÓN CASALES

Junior Fullstack Developer | .NET · Angular · REST APIs · MySQL

lulu.malagon21@gmail.com | Veracruz, Mexico (Open to relocation) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Junior Fullstack Developer with hands-on experience in end-to-end projects: database design, external service integration, and interface development. Built a complete e-commerce application (Yolotol) and contributed across multiple layers of an educational video game with NLP (ExpresaTEA): extended a web service with Wit.ai, developed game logic in Unity/C#, and designed evaluation metrics. Master's degree in Computer Systems.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Angular, Ionic, TypeScript, React

Backend: C#, .NET Core, ASP.NET MVC, Spring Boot, Java

APIs & Services: REST, SOAP, Postman, Wit.ai, PayPal API

Databases: MySQL, PostgreSQL, SQL, SQLite

Game Dev: Unity, C#

Other technologies: Python, Power BI, NLP, Basic ETL, Three.js

Tools: Git, GitHub, Figma, Autodesk Maya 3D

Languages: Spanish (Native), English (B1 – Intermediate)

PROFESSIONAL EXPERIENCE

Developer / Researcher | ExpresaTEA – Master's Project

Orizaba, Mexico • Oct 2023 – Sep 2025

- Developed an educational video game in Unity/C# to improve language skills in children with ASD, applying Natural Language Processing (NLP).
- Extended an existing web service with Wit.ai by implementing an in-memory cache system to accumulate pronunciation metrics across calls, generating a structured JSON with confidence, certainty, and custom metrics, including a download endpoint.
- Designed the level flow and a dynamic letter-selection menu per level, coordinating game modules and controllers.
- Developed a local SQLite database in Unity: initialization script that checks and creates the DB on first launch, user registration, and automatic audio organization by folder with child's name, pronounced letter, and direction.
- Published paper at CEIAAIT 2024 (UNAM): "Architecture of a video game for improving linguistic skills in children with ASD using NLP".

Web Developer | CCA Consultores

Guanajuato, Mexico (Remote) • Jan 2023 – Apr 2023

- Redesigned the industrial dashboard UI for real-time equipment monitoring, improving the 3D visualization experience using Three.js.
- Implemented web integration with C# and MySQL for real-time data synchronization.

Fullstack Developer | Yolotol – University Project

Cuiclauhuac, Veracruz • Aug 2021 – Nov 2022

- Built a fullstack e-commerce application using ASP.NET MVC, MySQL, JavaScript, and HTML5/CSS3.
- Implemented shopping cart, session-based authentication, role management system, and PayPal payment gateway.
- Participated in the full development cycle: requirements analysis, wireframes, coding, QA, and deployment.

EDUCATION

Master's in Computer Systems | Instituto Tecnológico de Orizaba

Orizaba, Mexico • Aug 2023 – Aug 2025

- Specialization in fullstack development, data analysis, and emerging technologies.

- Main stack: Spring Boot, Java, Python, React, TypeScript, Power BI.

B. Eng. in Virtual Environments and Digital Business | [Universidad Tecnológica del Centro de Veracruz](#)

Cuitlahuac, Veracruz • Aug 2019 – Apr 2023

- Quarterly projects in virtual reality, augmented reality, and web development (.NET, Ionic, Angular).
